Otolift

Over the years

Otolift; founded in 1891, have been a manufacturer of stairlifts for more than 45 years. Over the years the once small Otolift factory has now grown into one of the most innovative stairlift suppliers in the world.

As a family company, Otolift offers the care and attention that you don't always get from other companies. That particular piece of additional faith is exactly what you are looking for when purchasing a stairlift.

Family company since 1891

Otolift; founded in 1891, have been a manufacturer of stairlifts for more than 45 years.

100% Otolift

The Otolift Air is a 100% Otolift product. Designed, produced and installed by ourselves and our worldwide dealer network.

15,000 m2 factory

Over the years, Otolift have grown enormously and now have over 15,000m² of our own factory space.

On work days a new Otolift is installed somewhere in the world every 9.5 minutes.

160,000 stairlifts

More than 160,000 stairlifts installed worldwide.

Otolift Two

The stairlift with two slim tubes

The first thing you notice is that the Otolift Two takes up little space. The stairlift is compact yet still built extremely well.

The Otolift Two is a stairlift to be proud of. Its subtle and contemporary design blends in well with any interior.

Advantages of the Otolift Two

- Access to stairs remains free for other stair users
- Extremely solid construction
- Fits into any interior
- Short turns possible, so minimal loss of space
- Ultra-slim rail profile

Folds away when not in use

Short turns possible, so minimal loss of space

Otolift Two

Walking the stairs remains possible

When designing the TWO, Otolift did everything possible to make the rail and the chair as compact as possible.

The results are clear: The tubes are slim and they can be mounted very close to the wall. The chair is as compact as it is comfortable.

As a result, everyone is able to use your stairs with ease.

Otolift Two

Negotiating curves with ease

The Otolift Two is distinguished by its very slim tubes. Furthermore, these thin tubes are mounted quite close to the wall or handrail, consequently the rail nicely blends in with the interior so it is hardly noticeable.

Do you have a narrow staircase? Then you will be pleasantly surprised to find how the Otolift runs along either the outside curve or the inside curve. The rail is solid and well constructed so you can travel up and down the stairs feeling safe every time.

Otolift Two

The smart Otolift Two solutions

The Otolift Two offers a number of smart solutions. At the top of the stairs, the seat can be manually or automatically rotated (depending on the model), creating a safe dismount. The Otolift Two is also available with powered folding footrest for even more convenience.

The Otolift Two has solutions to suit your home. For instance, there may be little space in front of the stairs. In that case, you can opt for a retractable hinge rail. Of course, your Otolift can also be equipped with parking bends at the top or bottom of the stairs.

Otolift Two

Intuitive and easy to use

Your Otolift was designed for convenience. The use is quite intuitive and will soon become second nature.

Step 1

You move the chair towards you using the wireless controller.

Step 2

You unfold the chair lightly and easily.

Step 3

You sit down on the comfortable seat.

Step 4

Operate the control and the chair starts moving quietly and smoothly.

Step 5

The chair quietly continues its way upstairs and stops automatically.

Step 6

The seat turns automatically (depending on model) after which you step off safely.

Otolift Two

Intuitive and easy to use

Safe

The stairlift is also operative during a power failure.

Useful

The stairlift is equipped with levers to easily fold and unfold the footrest. You can opt for the powered version instead of the manual one.

Safe

The safety belt is easy to use and can be operated with one hand.

Handy

The seat can swivel, creating a safe dismount. You can opt for an automatic version instead of a manual one.

Safe

The stairlift will stop automatically once it detects resistance, which makes it safe for your hands, feet or any other obstacle.

Convenient

The chair is foldable when no in use and blends in with your interior.

Otolift Two

Specials

Fully automatic

The Otolift Two can be equipped with all additional conveniences. You can fold and unfold the footrest automatically and also swivel the seat fully automatically. This makes the Otolift Two even easier to use, enabling everyone to operate the stairlift with ease.

Juniors

If a stairlift is used by children, one thing is most important: their safety. Otolift ensures that the stairlifts used by children meet your highest demands. For children of any age there is an ideal Otolift, based on one of our models. The stairlift is equipped with individual control for parents. Dimensioning of the seat will be adjusted to the age.

Every Otolift is personalised to meet your needs. In addition, several adjustments to the lift can be made, which we would like to inform you about. Whether it is for your child or for yourself; Otolift Specials offer an excellent and especially a safe solution!

Increased lifting capacity - 150 kg

Otolift developed a model that can lift up to 150 kg. This stairlift offers the same benefits as the Otolift Two standard models, but can handle a weight up to a maximum of 150 kg. What makes this lift unique is that the dimensioning is exactly the same. The only difference is the width of the seat.

Higher chair

Do you suffer from knee problems preventing you from being able to fully bend them? Otolift offers a smart solution: a lift you can use partly standing up, so bending your knees is not necessary. This lift is also ideal for tall people who have a quite narrow staircase.

Otolift

Installation and service

The installation of your stairlift will be carried out by experienced technicians. Flawlessly, cleanly and quickly. After the installation you will receive a calm, clear and extensive explanation. The technician will not leave before every question has been answered and you master the stairlift!

Your Otolift stairlift is...

- Screwed to the stairs
- Neatly finished within three hours
- Calm, clear and extensive explanation
- Installed entirely by experienced technicians

Finished within three hours

An important part of our lifts design was to have the installation carried out as smoothly as possible. Over 160,000 customers will agree that we succeeded in this: Within three hours on average, your inconspicuous Otolift is installed in your stairway.

Extensive explanation

After the installation you will receive calm, clear and extensive explanation. The technicians will not leave until you master the entire equipment!

Screwed to the stairs

Your Otolift will be screwed to the stairs. As such, it is not necessary to drill into your walls or panels. If you would prefer to have the stairlift mounted to the wall due to the staircase material. No problem. We can offer this too.

Otolift

The advantages of Otolift

- ✓ Over 160,000 units sold
- ✓ A reliable familybusiness, since 1891
- ✓ 100% own production
- ✓ A solution for all stairs
- ✓ Value for money
- ✓ High quality and safety
- ✓ Innovative stairlifts
- ✓ Aesthetically pleasing

100% own design

The Otolift Air is designed entirely by us. The rail is installed using the latest software, to fit on your stairs exactly and as inconspicuously as possible.

100% own production

The Otolift Air, seat and rail are produced entirely by us. From bending tubes to cutting and processing parts of the chair. Everything is done in-house.

Arrange an Assessment for an Otolift

We have already provided a lot of information about our unique stairlifts. But what will be the cost of your Otolift?

Unfortunately as every staircase is different, and you have your own preferences and wishes, we cannot give a simple answer to this question without assessing your staircase and individual needs in person.

Free and non-binding staircase evaluation.

Our experienced advisors work all across the country and will be happy to visit you to give personal advice. Of course this is done free of charge and entirely voluntarily. Our adviser will evaluate your staircase and listen well to your individual wishes and preferences. He will give you transparent advice about which Otolift best fits you and along which side of the stairs it could best be installed.

At that moment, for us it is possible to determine the actual price of your Otolift.

Of course we hope that you will consider us when taking your next step: a non-binding staircase assessment!

A reliable family business, since 1891
