## Straight Stairs Model 600 - XL Arms: Dimensions and Technical Information

Manual one-way, one-way automatic swivel and two-way automatic swivel seat

Measurements are in millimetres. Measurements in brackets are inches. All dimensions measured from the wall are nominal. The addition of a wide stringer or similar obstruction may affect the dimensions taken from this point. The colour representation of the chair shown here is for illustrative purposes only. Weight limit note: Upto 52° - 160kg (approx 25 stone)

All product dimensions are accurate, however, you should add approximately 30mm on dimensions that require clearance for the user, such as the minimum swivel width dimension.

Rail to wall and minimum staircase width increases by 20mm if retractable rail required.
